

WINNEWALD DAY CAMP
UPDATED INFORMATION AND INSTRUCTIONS FOR COMPLETING SEVERE ALLERGY
ACTION PLANS AND EMERGENCY EPINEPHRINE INJECTION POLICY

Please read this entirely before completing or handling Severe Allergy Action Plans.

- Ideally, Allergy Action Plans and signed authorizations should accompany Health Forms but if not possible, **the plans are due 4 weeks prior to the opening of camp or 4 weeks prior to your camper's first day.** [It takes a considerable amount of time to process them, clarify unclear or ambiguous information and provide the necessary information to our staff so that we can maximize your camper's health and safety.]
- Action Plans are filled out and signed by both HCPs and parents. PLEASE LEAVE NO BLANKS, INCLUDING EMERGENCY CONTACTS.
- Copies of Allergy Action Plans from schools or other programs **will no longer be accepted** as they are specific to that organization's needs and liabilities.
- A separate consent for permission to let trained epinephrine delegates administer the **injections only** must also be completed, signed and handed in with the Action Plan.
- Failure to give delegate permission may limit your camper's ability to attend off-site trips as a medical professional does not accompany such trips.
- Do not provide an antihistamine (Benadryl or its generic) unless your HCP orders a different medication. We have all forms of generic Benadryl.
- Please be familiar with exactly what your HCP's instructions are. For example, if a **second** injection is ordered, you must provide **2** forms of injectable epinephrine.
- Please be sure that the epinephrine is not expired, has a readable and current prescription label and the solution is not cloudy or discolored.
- If you have any questions or concerns about the changes in these policies, please contact the Health Director at
